◎ OBJECTIVE

Seeking a qualified Backend Developer position. Holding a B.Sc. in Software Engineering, experienced in the Python and Node.js ecosystems. Proven experience in both established global companies and start-ups. Familiar with both monolithic and microservices architectures. Skilled in developing and scaling new products and features, contributing to business growth. Effective team member with excellent communication, training, and mentoring capabilities.

💼 PROFESSIONAL EXPERIENCE

2023 - Present | Growthspace | Senior Backend Developer
- Developed backend solutions using Node.js, Sequelize.js, TypeScript, NestJS, and Express.js.
- Designed and implemented scalable and efficient backend systems.
- Collaborated closely with other team members to ensure seamless integration and delivery of new features.
- Optimized existing systems for performance and scalability.
- Conducted code reviews and provided mentorship to junior developers.

Tech Stack: Node.js, Docker, Git, PostgreSQL, MongoDB, VS code, Google Cloud.

2021 - 2023 | Stargo | Python Developer
- Created algorithms to convert unstructured data into structured formats.
- Introduced new solutions in a dynamic start-up environment to deliver reliable results quickly.
- Designed and implemented systems from start to finish.
- Mentored and assisted new employees.
- Utilized microservices architecture to build large, maintainable systems.
- Maintained close relations with other divisions to enhance inter-team communication and productivity.

Tech Stack: Python, Git actions, MySQL, MongoDB, PyCharm, AWS.

2018 - 2021 | Intel | Network Engineer & Lab Intern
- Handled service requests and resolved issues with high customer satisfaction.
- Deployed network infrastructure (switches, routers, APs) in various environments.
- Developed lab software tools in Python.
- Managed global projects, including planning and task management.

Tech Stack: Switching, Routing and Wireless operations (CCNA), batch, Python, SQLite.
